Excerpt: .the proposition that multiplication is a relatively difficult mental operation. FRACTIONS Fractions, it will be remembered, are represented in the test by two sets, H and O. In the first, fractions of like denominators are added and subtracted; in the second, fractions of unlike denominator are added, subtracted, multiplied, and divided. As compared with the more complex examples in the fundamentals, it has been found relatively easy to make a study of errors. From the result set down by the pupil it is possible in most cases to determine what he did and how he did it. For this reason a more exhaustive study has been undertaken of the errors made in these two sets than was possible in connection with any one of the four fundamental operations. It should be added further that, since each of these sets is a complex, a separate study has been made of the errors occurring in each of the types of operation found in the sets. Thus the study of Set H is divided into two parts, the one concerned with the addition, the other with the subtraction, of fractions of like denominators. The study of Set O is consequently divided into four parts, dealing respectively with addition, subtraction, multiplication, and division of fractions of unlike denominators. FRACTIONS OF LIKE DENOMINATORS One hundred errors made in the addition of fractions of like denominators by eighth.grade pupils were analyzed and thrown into the five categories which appear in...
