Modern Motor-Vehicles.

By C B Rookes Evenlyn Bell Crompton

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: .rather difficult to understand; it would be better if it were stated that that was the vaporizing temperature, the fuel being gasolene. The temperature of the fuel before it was supplied to the generator was probably about 60. The temperature of the steam was shown to be at the boiler 353 of superheat, and at the engine 285 of superheat. The exhaust temperature, 288, seemed to be higher than the engine temperature initially. It would probably be better to show the initial temperature on the same scale as the exhaust temperature. The cut-off was stated to be at three-fourths of the stroke, and the very low consumption of fuel and water seemed particularly astonishing in view of that late cut-off. The Author. The Author pointed out that the engine was a compound engine, the cut-off being in the first cylinder only. Mr. Clarkson. Mr. Clarkson considered...

Reviews

A new e book with a brand new standpoint. I am quite late in start reading this one, but better then never. I discovered this ebook from my i and dad advised this publication to understand.

-- Jada Franecki II

Here is the very best book i have got read through until now. I could possibly comprehended everything using this composed e publication. You will not sense monotony at whenever you want of your time (that's what catalogues are for concerning should you ask me).
