## WE ARE FROM THE STARS: EXPLORING RELIGION

Trafford Publishing, Canada, 2005. Paperback. Book Condition: New. 277 x 208 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Each of us has walked through the fields or woods on a sunny day. As we admired the beauty on our nature tour we stepped over or around anthills that were on or near the trail, with little thought of them, except to be sure to avoid these mighty hordes as they rushed about their appointed tasks. Ants possess an elaborate and highly organized social structure based on divisions of labor and collective responsibility. Although each individual ant has very limited scope, the colony as a whole displays a remarkable level of purpose and intelligence. The construction of the colony's home involves extensive engineering projects. No individual ant carries a mental concept of the grand design. Each ant is simply an automaton (a purely mechanical item) to execute a simple set of operations. An efficient organization appears. Imagine space travelers passing Earth. As Earth rotates on its axis, they notice that it consists of four distinct areas—a globe with four large patches of color: red, blue, green and yellow. As they look closer, they notice that the red covers North Africa, Arabia, West and Central South Asia, and the islands of Southeast Asia. The blue covers India and the green covers China and the Far East. Yellow covers Europe, Australia, North America and South America. The significance of these four colors, or anthills, is religion. The red would be Islam; the blue would be Hinduism; the green would be Buddhism; and the yellow would be Christian. The answer to why each of us is practicing a particular religion can be directly related to which above geographical colors you were BORN-of which ant colony are you a member!...
