

A Design Study in 3D User Interface for Large Interactive Displays

Filesize: 2.89 MB

Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It's been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

(Prof. Loyce Runolfsson Jr.)

VDM Verlag. Paperback. Book Condition: New. Paperback. 108 pages. Dimensions: 9.1in. x 6.2in. x 0.4in. In this work, we present a prototype for a large interactive display (LID) application that provides a 3D representation of a collection of geo-referenced units of information to commanders taking part in a firefighting intervention. The main focus of the work was placed on the development and evaluation of relevant interaction mechanisms based on single and multi-touch enabled interactive displays. This book presents an application designed to display geo-referenced information inside a 3D scene. The application provides a collection of tools to support the user in the exploration and manipulation of the information. It further introduces the basic concepts and underpinnings sustaining the application and provides an overview of the whole implementation process, including the results of a usability evaluation conducted to assess the quality of the provided solution. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
